Transcript:

(00:00) all right let's start so could you tell me your full name please hello my name is min John Kim but I prefer called by Kimberly my English name yeah okay and are you working or are you a student I'm a student right now uh I'm in kyongyu University in Department of Tourism and manage a tourism and event management do you like your major I do like my major it's very interesting we learn about International conferences and tourism basically but my favorite part would be branding and marketing which is

(00:37) like super interesting okay now we're going to talk about morning time so do you like getting up early in the morning oh I am 100 for sure morning person I would get up at around seven so that I can do my morning routine like yoga writing journals so yeah I'm definitely a morning person what did you do in the morning when you were younger when I was younger actually um when I was young I wasn't a morning person I would always tell my mom like 10 more minutes please and just lie in bed so as a kid I didn't really enjoy morning yeah

(01:22) okay um and do you spend your mornings doing the same things on both weekends and weekdays I try to do that I am so into routines I always like to do the same thing over and over again which some people or some people might sound a little bit boring but for me it's just a way to start my day so yes I would definitely keep the routine okay and do you think it's important to eat breakfast in the morning ah that so I used to think that it's very important to eat breakfast to gain the energy for you know the day to get

(02:05) started um but to be honest right now I don't really eat breakfast I would just drink coffee uh it's so much easier and I feel like I want to spend more time on doing something else than eating breakfast which is kind of I don't know but yeah I feel that way indeed all right now we're going to talk about sports programs okay so do you like watching sports programs on TV yes and no it depends on what sports program it is for example I am really into volleyball especially like the Korean woman volleyball so I would

(02:43) definitely watch that but except for that uh no not really so it depends on the programs yeah and do you like to watch live sports games uh if it's like Olympic like a big sports event I would definitely watch since I'm also studying event so it's also like studying but also watching something fun um but if it's not like a big event I I wouldn't watch um okay and who do you like to watch sports games with oh my friends or my family uh I don't think it really depends like who I'm watching it actually it depends uh I

(03:25) like to watch it with people who likes the sports so we can cheer for the same team maybe we can argue I think that way it's even uh more fun yep and uh what kind of games do you expect to watch in the future in the future um I am not sure about that question but yeah I would again go for it volleyball since I'm really into it and um yeah volleyball I'll say yeah okay and when you were a child did you used to play sports yes a lot uh so during Middle School I was an international school in China we had a lot of after

(04:13) noon like activities so I would play soccer volleyball basketball track I did a lot of sports yeah all right that will do for part one so we'll go on to the second part no question this is the one okay you go there's a pencil for you thank you thank you all right so I'll give you one minute to take some notes you can begin that's one minute okay all right so yeah the part two question is

describe a place in your country or part of your country that you would like to recommend to visitors yeah um I would recommend Hyundai which

(05:03) is located in Busan Hyundai is basically a beach it's an area where you have so many things to do for example there would be swimming surfing beach ball and there's a lot of like cute cute decorated coffees around so it's very good for both people who likes to go into the water or don't um it's located in Busan for sure but I'm not so good at Geographic so I can't really say like which location it is but it's somewhere in Busan you can search up on Google Map and I would recommend I

(05:44) would really recommend this place since it's my hometown for example so I'm really I really love Busan and also it's super touristic place you get to meet a lot of new people you get to hang out it's also a great place to hang out with your friends and family a and I have a lot of memories in him there so I just have this good feeling that if you go to Hyundai you will have so much fun make so much good new memories and so on so yeah Hyundai is definitely a place I would uh recommend for the visitors and also I actually

(06:21) recommend it to my friends which I met back in Germany uh they actually knew about Hyundai since the train to put on the movie is super famous so they were like oh I'm so into going there and yeah so Hyundai would be great place for visiting yes all right perfect okay so we'll go on to part three of the test now okay all right so first question is it important to take photos when traveling Oh I love photo like I would definitely say photo is a big part of troubling since taking photo really makes you keep all the

(07:09) memories so even the troubling or the trip is ended you can always open your phone and seeing those pictures make you go back back to the time where you were having fun so photos videos whatever that is I would definitely yeah I think a lot of people should do that yes and are there any disadvantages of taking a lot of photos Yes actually so I traveled a lot of place in Europe I of course took a lot of photos but while taking photo you might miss something special that's happening around you so I think it's

(07:49) about choosing between are you going to keep the memory for longer or are you really into that place like at the moment right now so yeah yeah and what do you think people usually do with their photos that they take a lot of things actually first of all uh they would look at them and think of their good memories but also they would post on social media since it's a big platform right now I think social media is not only just about showing off but it's also about telling people new informations and sharing good things

(08:27) nice and can can you trust other people's travel journals on the internet and um it depends on the person or the personality I think uh some these days a lot of people get sponsored by certain like platform or they get a lot of sponsorship so if it's sponsored by someone or something that might make the post not so easy to believe but if it's like really personal opinions about it then yes I would trust but yeah you would have to seek for those who have really good informations yeah yes and how do you think people get

(09:23) information about new travel destinations these days oh uh actually I was surprised about how people search for the information I would usually go for Google or like Google Map for the informations but for example my friend and a lot of my friends around they use Instagram to search up the information for traveling so they would use hashtag to search up for example when they're going to it's a small country in I don't know Germany they would search up like a small town in Germany so it's so different these days and there's a lot

(10:01) of information so do you think is there any difference in the way younger people travel and the way older people travel totally totally I actually right now I'm studying about that so older people would use a travel agent to go to certain places since they have a lot of money first of all it depends on people of course but they have a lot of money they would invest invest kind of invest to the agent and they would see a lot of places but they would still be in a bus moving together and everything so they

(10:39) wouldn't care about like transportation and everything but on the other hand younger people they would go for self troubling I'll say if that's a word um yeah so I think there's a big difference I think yeah yeah right what are what do you think is the biggest advantage of traveling by yourself and not in a tour group definitely I think if you're traveling by yourself you get to meet new people it's easier to access since you're not in a group you don't have friends around you so you maybe get to reach out for

(11:18) help and stuff and in that kind of uh if that situation comes up you'll get to meet a lot of new people which is such a great opportunity so yeah perfect thank you that will do us thank you thank you all right okay let's start let's give you some feedback about your test I would estimate your score to be 8.

(11:43) O today really good test thank you very fluent answered all the questions thoroughly and well so that's very positive um just there are a few grammar things I'll just point out right one habit I think of yours was using the word would right you say like I would get up in the morning I would just drink coffee instead of breakfast would there are many meanings to this word right but wood can be used for past habits so like when I was in Middle School I would hang out with my friends every day it's kind

(12:18) of similar to used to okay in this situation but in in these ones I would say like I usually or I tend to or I normally any of these three but like that that popped up I think in part one and part three so I would just review that one all right that's one that's one um other one okay it depends on people it depends on people when you use it depends on we want to say it depends on the plus singular so it depends on the person depends on the person it depends on the season depends on the day yeah so that's that's

(12:53) one rule we should go with um okay I asked you who did you like to watch sports with and you said I don't think it depends who I watch sports with a better word there would be matters matters I don't think it matters or it matters uh who I watch the sports with what else what else have we got a couple of things with plurals when you talked in part three taking photo make sure to put the ass there taking photos taking photos is important and I have traveled to a lot of places places a couple of times there

(13:29) um one other thing with plural right new informations so information is a uncountable now right so yeah new information you can say like piece of information about information itself is uncountable uh one other one right uh seek for okay look for so with seek s-e-e-k we have no preposition so seek new information but with Luke yeah look for new information search for your information yeah so there's just a few things but it's really good test very fluent answer the question as well so thanks for coming in thank you thank you

(14:08) all right
